All-round safety on doors

athmer door stop HS-25

PRODUCT FAMILY FOR TIMBER AND GLASS DOORS

- / Prevention of crushing and shearing points on the main closing edge of a door
- / Automatic safety function when the door is opened - standard-compliant safety distance of 25 mm protects children's hands
- / Prevents doors from closing unintentionally, e.g. in the event of a draught
- / Ideal for use in nurseries and daycare centres or highly frequented school doors

HS-25

HS-25 single-sided

HS-25 Glass

PRODUCT ADVANTAGES

- / Can be retrofitted to timber or glass interior doors
- / One-hand operation with latching function for easy opening and closing of the door, e.g. with a child in your arms
- / Automatic triggering of the closing stopper when the door is opened
- / Application depending on customer requirements: Can be operated from one or both sides of the door
- / Colour adaptation on request
- / TÜV/GS-tested in accordance with EN 16654
